Subject: RE: ShoreSox

Brian –

I enjoyed meeting you and seeing your demonstration of the Shoresox system. The goal of the installation is stabilization of the existing shoreline / water interface slope and is not intended to correct any existing deficiencies in the overall lake bank slope (flattening any existing areas that are steeper than the 4:1 criteria). There is no proposed earthwork to take place nor any changes to the water management system. Therefore, installation of the Shoresox would not require a permit from our agency. There is nothing in the product design or placement method that would be prohibited or regulated by our criteria and it would be considered maintenance.

Best wishes,

Jeff Gronborg, P. E.
